PROBLEM STATEMENT

- Approximately 54% of rural households in Bangladesh lack internet access,
- Studies have shown that students with high-speed internet connectivity are more likely to complete high school and pursue tertiary education.

- During the 2020 U.S. Census, the shift to online data collection posed significant challenges in rural regions with inadequate internet infrastructure.

What is LearnHub?

LearnHub is an innovative educational platform designed to democratize access to quality education by seamlessly integrating online and offline learning experiences. The platform addresses the critical challenge of inconsistent internet connectivity in underserved areas while maintaining a rich, interactive learning environment.

KEY FEATURES

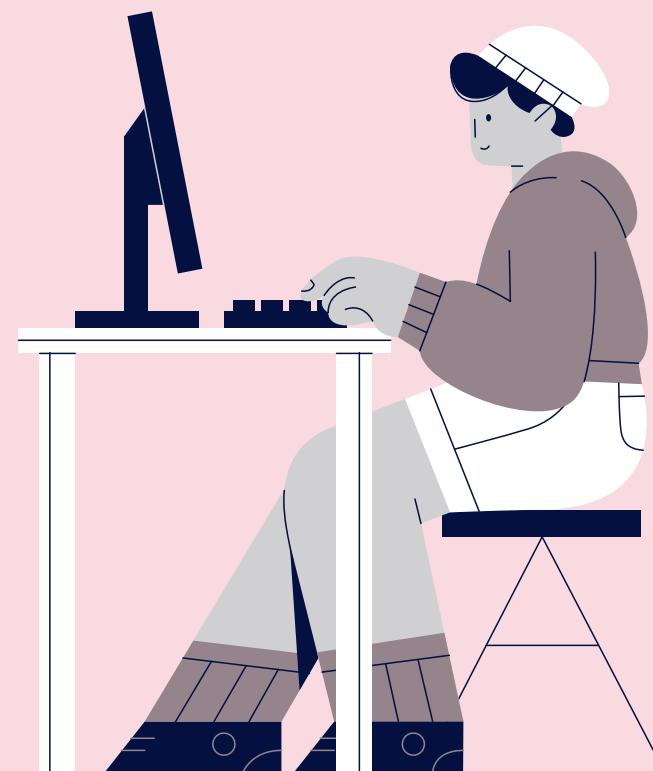

03

Offline Content

- Offline Content Access
- Efficient Content Management
- Offline Content Sharing

Content Engagement

- Earn Scores by Reading Content
- Gain Rewards for Sharing Content
- Gain Points by participating in research study

Research Collaboration

- Contribute to Projects with Offline Data Sync
- Ensure Accuracy with Data Verification
- Download Shared Data in CSV Format

Rich Content Experience

- Access Well-Formatted Markdown Content
- Listen with Built-in Audio for Accessibility
- Curated by Top Educators on an Invite-Only Platform
